

# BRANT COVID-19 VACCINATION PLAN: OVERVIEW

A) Priority Populations aligned with Provincial direction. Further sequencing may be completed as indicated in Brant COVID-19 Vaccination Sequencing Task Force. Populations are estimates from various sources including 2019 estimates from 2016 Census and input from stakeholders.  
 B) Individuals to be vaccinated assumes an average of 75% of the total population will choose to receive COVID-19 vaccination. Some populations may have higher and/or lower percent uptake.  
 C) Required doses assumes all individuals who choose to be vaccinated require 2 doses (based on Pfizer, Moderna). As additional vaccine products may become available this plan will be adapted as required.  
 D) Proposed vaccine sites by population. Note that further planning is underway to identify the most appropriate vaccine delivery methods by priority population. Dates are subject to change contingent on vaccine supply.
